

The Kube System Essentials

The new Kube 'Essentials' offers an affordable unit that still packs a punch with unmatched charging capabilities, versatility, and engaging design. Kube Essentials charges ALL mobile electronics, including laptops with an AC power outlet. The option of a Qi Charging Pad accessory allows guests to 'drop and charge' smartphones.

Kube Essentials ensures investment protection with built-in charging cables that are completely upgradeable to next generation charging formats, including USB Type-C (reversible plug capability). As a clock, the LCD is large and easily seen from across the room. It features simple dimming controls, a straightforward alarm set and snooze button.

With a compact and sleek design featuring a waterfall display trimmed with a chrome edge, the Kube Essentials won't clutter the bedside table and will look fabulous with any guest room decor. Kube Essentials is the quintessential hotel in-room amenity for today's hotel guests.
